PROFESSIONAL SUMMARY

Highly motivated third-year Computer and Control Engineering student focused on Data Engineering, Python, SQL, and Data Analysis. Hands-on experience gained through DEPI Data Engineering training, Olspark Data Analysis training, and practical projects involving data collection, data cleaning, data transformation, data aggregation, data retrieval, database design, and data logging. Strong foundation in ETL/ELT concepts, relational databases, data processing, data quality, analytical thinking, and problem-solving skills. Demonstrated strong collaboration skills and effective communication with a data-driven approach to foster teamwork and achieve goals. Seeking a Data Engineer Intern or Junior Data Engineer opportunity.

TECHNICAL SKILLS

PROGRAMMING & DATABASES

Python SQL SQL Server Relational Databases
Database Design SQL Queries

DATA ENGINEERING

DE Fundamentals ETL/ELT Concepts
Data Pipelines Data Integration Batch Processing
Data Quality

DATA PROCESSING & ANALYSIS

Pandas NumPy Data Cleaning
Data Transformation Data Aggregation
EDA & Visualization

AI, TOOLS & HARDWARE

Machine Learning Scikit-learn OpenCV
Git / GitHub Linux / Ubuntu Arduino & Sensors

PROFESSIONAL EXPERIENCE

Data Engineering Trainee

Jul 2026 – Dec 2026

Digital Egypt Pioneers Initiative (DEPI)

- Applied Python and SQL concepts to data processing, data retrieval, and database management tasks, achieving 100% execution accuracy across course assignments.
- Practiced end-to-end data collection, data cleaning, data transformation, data aggregation, and data analysis workflows on datasets with over 10,000 rows.
- Studied ETL/ELT architectures, data pipeline mechanics, and optimized relational database operations in SQL Server to improve query efficiency by 25%.
- Demonstrated strong collaboration skills and teamwork to complete 5 technical group tasks and studied data quality fundamentals.
- Used Git and version control concepts in technical work and developed practical analytical thinking and problem-solving skills.

Data Analysis Trainee

Aug 2026 – Sep 2026

Olspark Practical Data Analysis Training

- Performed dataset manipulation, grouping, aggregation, sorting, and visualization using Pandas and NumPy across 4 real-world datasets.
- Leveraged effective collaboration skills, communication, and data-driven problem solving to extract actionable business insights, reducing data cleaning errors by 30%.

SELECTED PROJECTS

Sales Data Analysis

Python, Pandas, NumPy, SQL

- Collected, cleaned, and combined 3 sales datasets to calculate metrics like total sales from quantity and price.
- Applied groupby aggregations and summarization on 5,000+ transactions.

Library Management DB

SQL Server, Schema Design

- Designed a relational database schema with 6 interconnected tables and foreign keys.
- Executed 15+ optimized SQL queries enforcing data quality principles.

ESP32 Weather Logger

ESP32, Sensors, SD Card, I2C

- Built an embedded data collection system for temperature, humidity, light, and air quality.
- Logged 1,000+ continuous sensor readings to an SD card.

Li-Fi Laser & Robotic Arm

Arduino, Lasers, Servos, HC-05

- Developed optical audio/data transmission system using lasers and sensors.
- Integrated alongside a 6-DOF Bluetooth-controlled robotic manipulator arm.

EDUCATION & CERTIFICATIONS

High Institute of Engineering & Technology (KFS-HIET)

Computer & Control Engineering (Electrical Dept)

Status: Third-Year Student

Certifications & Languages

• AI Literacy — AI Empower Yourself

MCIT, Microsoft & Fast Lane

Languages: Arabic (Native) | English (B2)
